The Four Pillars of Education, described in Chapter 4 of *Learning: The Treasure Within*, are the basis of the whole report. These four pillars of knowledge cannot be anchored solely in one phase in a person's life or in a single place. There is a need to re-think when in people's lives education should be provided, and the fields that such education should cover. The periods and fields should complement each other and be interrelated in such a way that all people can get the most out of their own specific educational environment all through their lives.
